

INFRARED BLACKBODY CALIBRATION SOURCE FOR BODY TEMPERATURE GUNS

- Modern design, simple setup and operation.
- Portable and rugged design, with light weight, not only suitable for laboratory calibration but also on-site work.
- Calibrates infrared thermometers quickly and accurately.

This novel blackbody calibrator **TB2001** is the ideal calibration source of infrared ear thermometers and infrared forehead thermometers, and it can be used for infrared surface screening instruments. Its operating temperature range is from 5°C to 50°C (41°F to 122°F) with high accuracy and stability.

Technical Specifications	
Temperature Range	5°C~50°C (41°F to 122°F)
Stability	±0.1°C
Temperature Resolution	±0.1°C
Cavity Diameter	Ø70mm
Cavity Emissivity	≥0.95
Power	100~240VAC, 50/60Hz
Weight	2.5 kg
Dimensions	120 x 120 x 275mm
Ambient Temperature	0°C~65°C (32°F ~149°F)

To Order

Model Number: **TB2001**

Description: Infrared Blackbody Furnace for Ear and Forehead thermometer
